

Presentation Quality and environment

In our company the word QUALITY has many meanings. The product quality, the service quality, the quality, represents different aspects that allow us to sell not only the product but also the services attached to the product. In our company the quality is warranted by the procedures in conformity to the law ISO 9001:2015. We obtained the certifications IATF 16949:2016 to satisfy the qualitative needs of customers of automotive sector. An equipped complete laboratory, with instruments for mechanical and chemical tests, allows us to produce items with constant quality mixes. We can test in our laboratory :the hardness, the length and the charge to break, laceration, compression-set, rheometric tests, oils maturation, analyses TGA e IR and others analyses.

The main rules for a respectful production are the care and the respect of the ENVIRONMENT. Duci S.r.l. respects the safeguards procedures for the environment. All the polluted materials are continuously controlled, substituted and sold off according to the laws in force.

Our company is certificated in conformity with the environmental law ISO 14001:2015, we have the object to maintain intact the environment.
